

Foreman, o projeto (Upstream) do Red Hat Satellite

ConFLOSS - Agosto de 2025

Waldirio M. Pinheiro (*PSME @ Red Hat Canada*)

Agenda

- Sobre
- Big Question
- Projeto vs Produto / Upstream vs Downstream
- Comparativo do RH Satellite vs Foreman Turbinado
- Sem Cobrança, Sem Custo, Upstream++
- Funcionalidades
- Jobs / Oportunidades

Sobre

Sobre

- Waldirio / Wally
- Casado (Linda Família)
- Brasileiro no Canadá desde 2018
- Apaixonado por Tecnologia/OpenSource, desde 1996
- Shadowman Tattoo
- Escritor do livro Spacewalk (Upstream do RH Satellite 5)
- Zona de Conforto. Fuja!
- Seja Humilde, lembre-se de suas raízes ... sempre
- Compartilhar é um ato de amor! [YouTube](#) & [LinkedIn](#)

Big Question

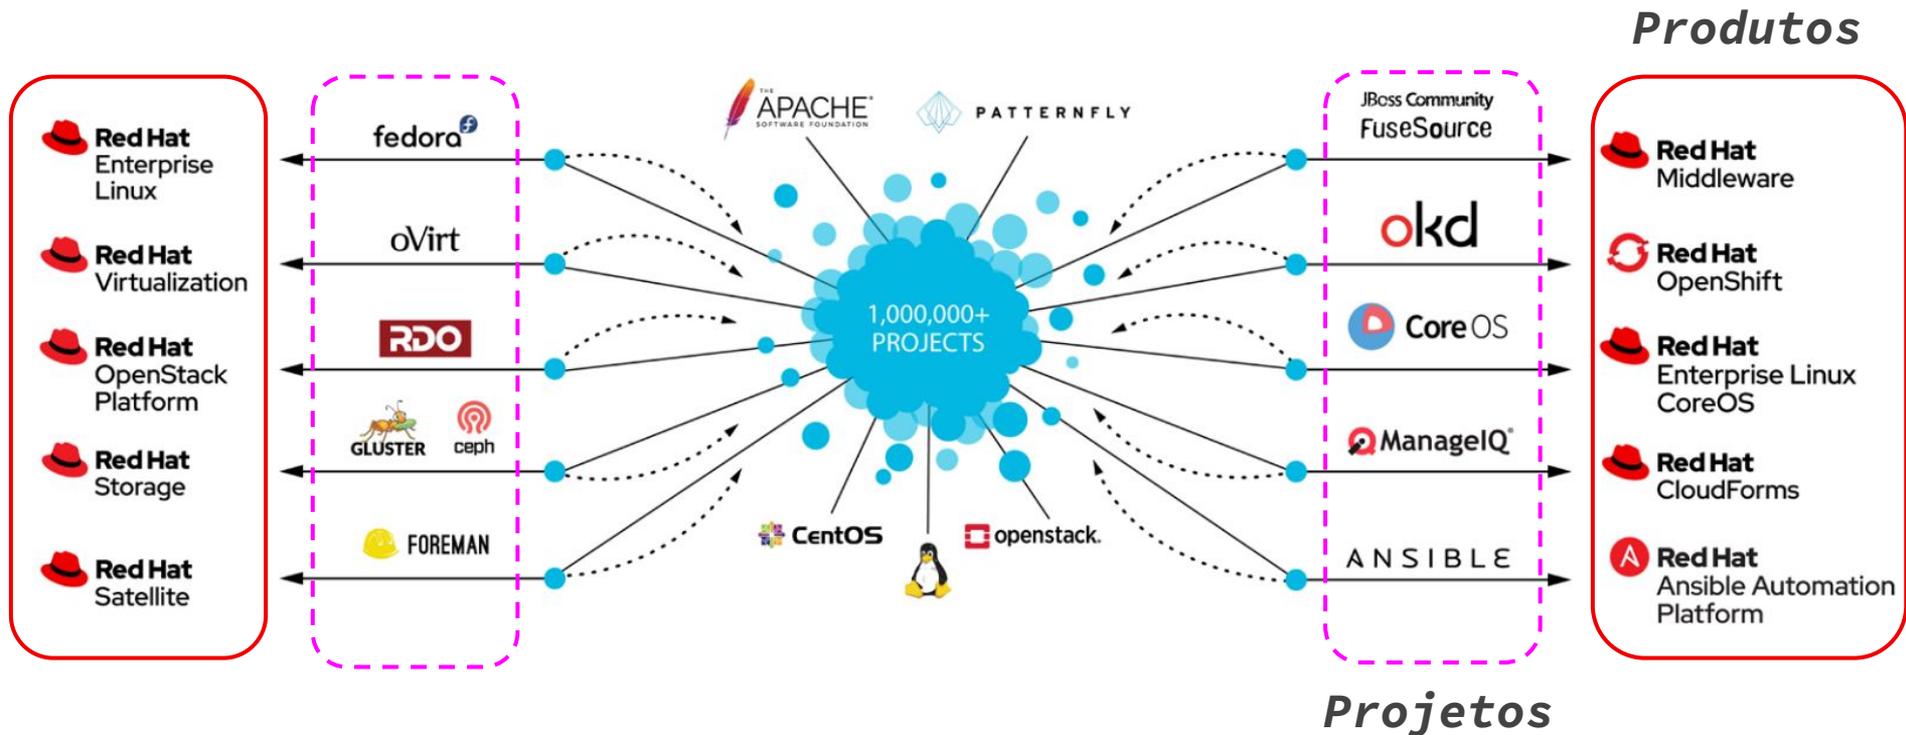

Big Question

Como posso aplicar para a vaga, se não tenho experiência?

Como posso ter experiência, se não tenho \$\$ para comprar uma subscrição (Satellite, OpenShift, ...)?

Version 3.15.0

Comparativo do RH Satellite vs Foreman Turbinado

The screenshot displays the Red Hat Satellite web interface. The top navigation bar shows the Red Hat Satellite logo, the organization name 'ACME', the location 'New West', and the user 'Admin User'. A search bar is located on the left side of the main content area. The main content area is titled 'Overview' and contains four data panels:

- Host Collections:** A table showing updates for three host collections.
- Sync Overview:** A table showing the status of synchronization for two products.
- Content Views:** A table showing the status of published content views.
- Latest Errata:** A table showing the latest security errata for various products.

Host Collections

| Updates | Name | Content Hosts |
|--------------------------------------|------------------|---------------|
| ■ | bash_hc | 2 |
| ■ | new_hc_bash_test | 2 |
| ■ | hc_video | 0 |

Sync Overview

| Product | Status | Finished |
|------------------------------|-------------------|--------------------|
| Red Hat Enterprise Linux ... | Syncing Complete. | about 13 hours ago |
| zabbix | Syncing Complete. | 17 days ago |

Content Views

Comparativo do RH Satellite vs Foreman Turbinado

The image displays two overlapping web dashboards. The background is the Red Hat Satellite interface, and the foreground is the Foreman Turbinado interface.

Red Hat Satellite (Background):

- Header: Red Hat Satellite, ACME, New West, Admin User.
- Left Sidebar: Monitor (Dashboard, Host Statuses, Facts, Audits, Jobs, Reports, Satellite Tasks), Content, Hosts, Insights, Configure, Infrastructure, Administer.
- Overview Panel: Search, Host Collect, Updates, Content View (ccv_acme_rhel8_3.0, cv_rhel8_3.0, ccv_acme_rhel8_2.0, cv_rhel8_2.0, cv_rhel9_new, ccv_acme_rhel9).

Foreman Turbinado (Foreground):

- Header: FOREMAN, Default Organization, Default Location, Admin User.
- Left Sidebar: Monitor (Dashboard, Host Statuses, Facts, Audits, Jobs, Reports, Foreman Tasks), Content, Hosts, Configure, Infrastructure, Administer.
- Overview Panel: Search, Generated at Aug 12, 04:56 PM, Manage, Documentation.
- New Hosts Table:**

| Host | Operating System | Owner | Created | Installed |
|-------------------------------|------------------|------------|--------------|-------------|
| foreman00-node01-ol9.king.lab | OracleLinux 9.5 | Admin User | 7 hours ago | 7 hours ago |
| foreman00-node02-ai9.king.lab | AlmaLinux 9.6 | Admin User | 7 hours ago | 1 hour ago |
| foreman00-node03-fedora42 | Fedora 42 | Admin User | 7 hours ago | 1 hour ago |
| foreman00.king.lab | CentOS Stream... | | 23 hours ago | N/A |

- Host Configuration Chart for All:** A donut chart showing 100% completion with the text "No report".
- Latest Errata Table:**

| Type | Errata |
|-------------|---------------------------------|

Features

Who uses Foreman

Quickstart

Sponsors

<https://theforeman.org/>

FOREMAN

Foreman is a complete lifecycle management tool for physical and virtual servers. We give system administrators the power to easily automate repetitive tasks, quickly deploy applications, and proactively manage servers, on-premise or in the cloud.

GET STARTED

LEARN MORE

Latest versions: 3.15.0 / 3.14.0

Sem Cobranca, Sem Custo, Upstream++

Quickstart Guide

The Foreman installer is a collection of Puppet modules that installs everything required for a full working Foreman setup. It uses native OS packaging (e.g. RPM and .deb packages) and adds necessary configuration for the complete installation.

Components include the Foreman web UI, Smart Proxy, a Puppet server, and optionally TFTP, DNS and DHCP servers. It is configurable and the Puppet modules can be read or run in “no-op” mode to see what changes it will make.

The installation will require 4GB of memory, see [System Requirements](#) for more information.

Supported platforms

- Enterprise Linux 9, x86_64
- Debian 11 (Bullseye), amd64
- Debian 12 (Bookworm), amd64
- Ubuntu 22.04 (Jammy), amd64

Enterprise Linux

The Foreman packages and installer are tested on AlmaLinux 8, AlmaLinux 9, CentOS Stream 8 and CentOS Stream 9, but other RHEL derivatives can work because they're similar. Sometimes additional work may be needed. For any queries for these platforms raise a question in [discourse support section](#)

Installation

The [Foreman installer](#) uses Puppet (6 or later required) to install Foreman. This guide assumes that you have a newly installed operating system, on which the installer will setup Foreman, a Puppet server, and the [Smart Proxy](#) by default. It's not advisable to follow the steps below on an existing system, since the installer will affect the configuration of several components.

If you want to manage content (for example, RPMs, Kickstart trees, ISO and KVM images, OSTree content, and more) with Foreman please follow the [Katello](#) installation instructions. If you are a new user, ensure that you familiarize yourself with [Katello](#) and decide whether you want to use its features because installing Katello on top of an existing Foreman is unsupported. Note that you cannot install Katello on Debian systems.

Select operating system

Select operating system

To provide specific installation instructions, please select your operating system:

Repositories

Enable Puppet's 8.x repository:

```
sudo dnf -y install https://yum.puppet.com/puppet8-release-el-9.noarch.rpm
```

Enable the Foreman repositories:

```
sudo dnf -y install https://yum.theforeman.org/releases/3.15/el9/x86_64/foreman-release.rpm
```

Downloading the installer

```
sudo dnf -y install foreman-installer
```

Running the installer

The installation run is non-interactive, but the configuration can be customized by supplying any of the options listed in `foreman-installer --help`, or by running `foreman-installer -i` for interactive mode. More examples are given in the [Installation Options](#) section. Adding `-v` will disable the progress bar and display all changes. To run the installer, execute:

```
sudo foreman-installer
```

After it completes, the installer will print some details about where to find Foreman and the Smart Proxy. Output should be similar to this:

```
* Foreman is running at https://theforeman.example.com
  Initial credentials are admin / 3ekw5xtyXCoXxS29
* Foreman Proxy is running at https://theforeman.example.com:8443
The full log is at /var/log/foreman-installer/foreman-installer.log
```

The screenshot shows the homepage of the Foreman project website. The browser's address bar displays "theforeman.org" and "Incognito (2)". The navigation menu includes "GET STARTED", "GET HELP", "GET INVOLVED", and "NEWS". The "GET INVOLVED" dropdown menu is open, showing "Community", "Report a bug", and "Contribute". A red arrow points to the "Report a bug" option. The main content area features a yellow hard hat icon, the word "FOREMAN" in large white letters, and a description of the tool. At the bottom, there are "GET STARTED" and "LEARN MORE" buttons, and a footer with the text "Latest versions: 3.15.0 / 3.14.0".

Funcionalidades - Compliance usando OpenSCAP

The screenshot shows a web-based interface for reviewing remediation actions. The title bar reads "Install AIDE" with a close button. Below the title bar, the rule being remediated is identified as "Remediate xccdf_org.ssgproject.content_rule_package_aid_installed rule".

A sidebar on the left contains a progress indicator with three steps: "1 Select snippet", "2 Review hosts", and "3 Review remediation" (which is currently selected).

The main content area is titled "Review remediation" and includes the instruction: "Review the remediation snippet that will be applied to selected host(s)."

A prominent warning box states: "Do not implement any of the recommended remedial actions or scripts without first testing them in a non-production environment. Remediation might render the system non-functional."

Below the warning, there are three links: "View selected hosts", "foreman00-node03-fedora42", and "Other hosts failing this rule".

A code editor at the bottom shows the following remediation snippet:

```
# Remediation is applicable only in certain platforms
if rpm --quiet -q kernel || rpm --quiet -q kernel-uek; then
```

At the bottom of the interface, there are three buttons: "Run" (highlighted in blue), "Back", and "Cancel".

Big Question

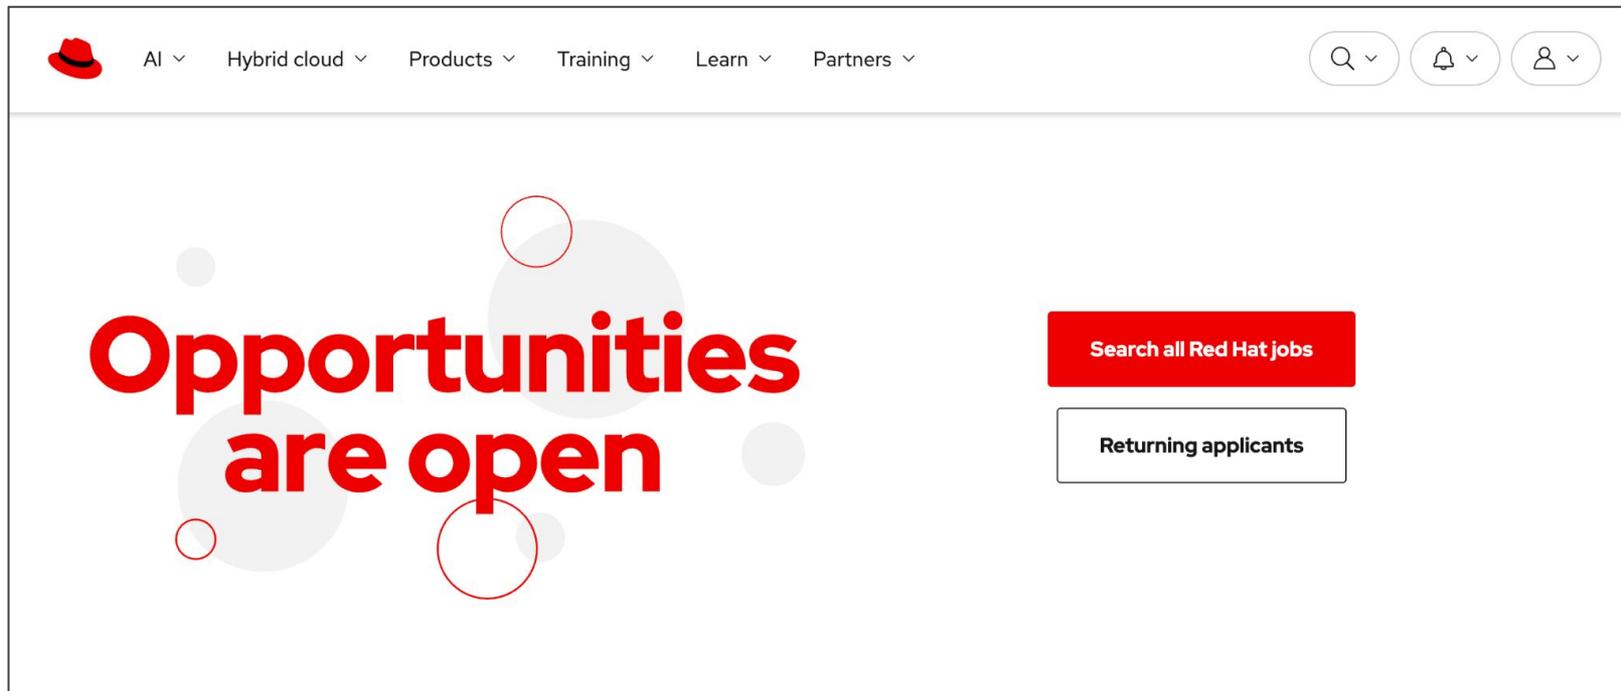

Big Question

Como posso ter experiencia, se nao tenho \$\$ para comprar uma subscrição (Satellite, OpenShift, ...)?

Jobs / Oportunidades

Jobs / Oportunidades

The screenshot shows the top navigation bar of the Red Hat Jobs website. On the left is the Red Hat logo. To its right are navigation links: AI, Hybrid cloud, Products, Training, Learn, and Partners, each with a dropdown arrow. On the right side of the navigation bar are three circular icons: a search icon, a notification bell icon, and a user profile icon, each with a dropdown arrow. Below the navigation bar is a large white banner area. On the left side of the banner, the text "Opportunities are open" is written in a large, bold, red font. The background of the banner features several overlapping circles in shades of gray and red. On the right side of the banner, there are two buttons: a red button with the text "Search all Red Hat jobs" and a white button with a black border and the text "Returning applicants".
